

Colour filter set hydrosun®HC7

The versatility of the unique hydrosun®-wIRA (water-filtered infrared-A) is complemented now by the colour filter set hydrosun®HC7. With its wide spectrum of application it can soon become an indispensable aid for you or your clinic. All hydrosun® colour filters are permeable to infrared.

This system is unique and combines the scientifically proven and successfully applied wIRA-therapy with colour light and its empirically grounded effects. Thereby Hydrosun bridges these different points of view (evidence based medicine vs. natural medicine) which usually seem to be irreconcilable, and complies with the request of many naturopathic physicians, non-medical practitioners and patients.

The part of visible light allows the colour therapy, the therapy of acne and the use of the effective photodynamic therapy (the latter is to be carried out with the special device PhotoDyn®750! Informations available under <http://www.heinemed.de>).

The water-filtered infrared-A (wIRA) – on the other hand – results in improved blood circulation in deeper tissue layers, better oxygen supply of tissue, increased cell metabolism while washing out metabolites, pain relieve and muscle relaxation.

Hence many clinical indications can be treated (informations: www.hydrosun.de). Recent research shows that wIRA on cellular basis helps to improve wound healing, shows a protective effect against sunburn and it is well tolerated by the skin.

Further examples for the use of hydrosun®HC7

The table below shows additional options derived from literature how to connect with qualitative aspects to the colours.

1 Indications western system

2 Chakras eastern system

3 Symbolism of colours

Red	<ol style="list-style-type: none"> 1 Stimulates the sensory nervous system, causes rapid expulsion of toxins through the skin, stimulates liver activity, stimulates hemoglobin production, antidote with burns of x-ray, gamma-ray and ultra-violet. 2 Color of the root chakra (Muladhara), Correspondents/Organs: adrenals, ovar/testicules, reproductive system. 3 Dynamics, power, increasing the quality of life, will and determination, security.
